## **Norfolk Transitional Grant Area**

The Norfolk Transitional Grant Area (TGA) is comprised of 14 Cities/Counties in Virginia and one county in North Carolina. The TGA has an estimated population of 1,717,160. The TGA's general population racial/ethnic representation is 56% White/Caucasian, 30% Black/African American, 4% Multiracial, 4% Asian, and less than 1% combined for American Indians, Alaskan Natives, Native Hawaiians and/or Pacific Islanders. Approximately 7% of above races identify as being Hispanic or Latin in origin.

## **Planning Responsibilities**

Section 2602(b)(4)(C) of the PHS Act requires PCs/PBs to determine the priority for RWHAP allowable services and service allocations of RWHAP Part A funds every year. To fulfill this responsibility, EMA/TGA PCs/PBs set service priorities and allocate RWHAP Part A funds based on the size, demographics, and needs of people with or affected by HIV, with particular focus on individuals who know their HIV status but are not in care. The RWHAP Part A PCs/PBs also are responsible for evaluating the efficiency of the recipient in distributing funds to service providers.

PCs/PBs analyze information to develop an in-depth understanding of the current HIV epidemic and its impact on the service area. PCs/PBs review needs assessment data, HIV epidemiologic data, and co-occurring conditions data. The review includes service utilization data related to complexity of providing care, including service availability and unit cost per service, as well as service needs of emerging populations. The purpose of these data reviews is to guide decisions about HIV-related services and resources in the EMA/TGA. Furthermore, planning and implementation of the RWHAP Part A is driven by overall comprehensive planning and the recently developed Integrated HIV Prevention and Care Plan, including the Statewide Coordinated Statement of Need, Calendar Year (CY) 2022-2026 as a roadmap for relevant goals, objectives, and strategies for delivering RWHAP Part A services along the HIV care continuum. Locally developed Ending the HIV Epidemic plans, where available, might also serve as a valuable roadmap.

## **Priority Setting & Resource Allocation Process**

On an annual basis, the Planning Council convenes its membership, a culturally diverse group of members representing multiple organizations to include those funded by Ryan White HIV/AIDS Program (RWHAP), Centers for Disease Control and Prevention (CDC), Housing Opportunities for Person's living with HIV/AIDS (HOPWA), State funded HIV/STI Prevention and Care organizations, as well as consumers of the RWHAP and local community members. This group of diverse individuals convenes annually to provide guidance in developing priorities and allocating funds to service categories for the Ryan White Part A program in Chesapeake, Norfolk, Virginia Beach, Portsmouth, Suffolk, Isle of Wight, Hampton, Poquoson, Newport News,

Williamsburg, James City County, Gloucester County, Mathews County, York County, and Currituck County., NC which makes up the Norfolk TGA.

The Planning Council of Norfolk TGA has developed a data driven model for conducting the annual Priority Setting and Resource Allocations (PSRA) process. The process is divided into 4 components: (1) PLWH currently in the RW Part A/MAI care system; (2) PLWH that are newly diagnosed that will enter the RW Part A/MAI program utilizing the TGA's Epidemiological data; (3) out of care individuals to bring into care based on the TGA's underserved populations; and (4) unaware individuals who do not know their HIV status, identifying, testing, and linkage to appropriate medical care. The latter component will occur through the EIS/EIIHA Plan and will work in conjunction with various community partners and funded programs that address HIV and co-morbidities in the TGA.

#### Friday, September 8, 2023: Mandatory Data Session and PSRA Training.

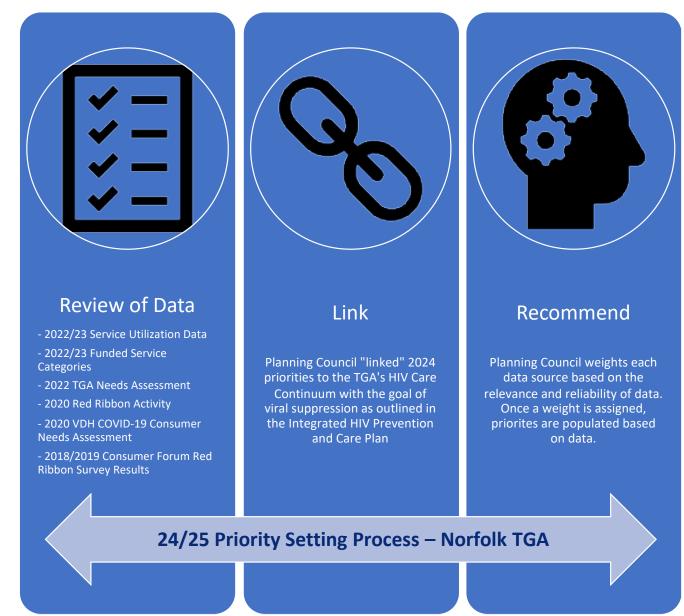

The data session and PSRA training will take place via Zoom Conferencing due to the COVID-19 pandemic and the Planning Council's inability to meet in person. The mandatory data session and PSRA training will include the review of the following data sets:

- 1. Glossary of Terms
- 2. Policy Clarification Notice 16-02
- 3. 2023/24 Notice of Grant Award
- 4. 2022/23 Service Utilization Data
- 5. 2022/23 Funded Service Categories
- 6. 2018/19 Consumer Forum Red Ribbon Survey Results
- 7. 2020 VDH COVID-19 Consumer Needs Assessment
- 8. 2020 Red Ribbon Activity
- 9. 2022 TGA Needs Assessment

The Planning Council facilitates the collection of integral PSRA data through the community input process by: 1.) Community Development Committee of the Planning Council; 2.) client satisfaction surveys and needs assessments; 3.) PLWH forums and townhall meetings; 4.) Consumer Advisory Board members; 5.) RW Part B; 6.) RW Part F; 7.) CDC Prevention subrecipients; 8.) HOPWA Recipient/Subrecipients and 9.) State Medicaid representatives. All aspects of planning is linked to the TGA's HIV CoC, NHAS, Integrated HIV prevention and care plan, Ending the HIV Epidemic (EHE) and with the goal of community viral suppression as outlined in the TGA's Integrated HIV Prevention and Care plan.

#### Friday September 8, 2023: PSRA Workshop.

The PSRA Workshop will take place via Zoom Conferencing. The PSRA Workshop will focus on the key components of *Priority Setting* and *Resource Allocations* (PSRA). The PSRA process includes the following steps: *Determination of data needs* – The Planning Council identifies data which is needed for the PSRA process, and Planning Council Support staff request this data in advance of the PSRA data session. *PSRA process review for PC member* – Planning Council Support staff presents information on the process for PSRA. This includes a review of the requested data sets mentioned previously and Planning Council member expectations. *Presentations of data* – RWPA service utilization data over a 3-year period is presented to the Planning Council prior to PSRA. *Determination of priorities* – Based on data presented, the Planning Council determines the priority for each service category to be funded by ranking data sets. The Graphic below demonstrated the *Priority Setting* process in the Norfolk TGA.

Resource Allocation: Based on the data presented and the assigned priority, the Planning Council determines how much funding should be allocated to each service category. Final approval – the Planning Council votes to approve the final priorities and allocation of funds for each service category. The graphic below demonstrates the Resource Allocation process in the Norfolk TGA.

#### **Review of Data**

Planning Council reviews a 4 year trend of cost and service utilization data for all service categories. The following are data sets:

- 1. Unduplicated client count
- 2. Unit cost by service category
- 3. Average cost per client
- 4. Other funding sources (RWHAP, HOPWA, Medicaid)

### **Resource Allocation Components**

The Planning Council utilizes data sources to determine all resource allocations for GY2022/23 with focus on the following 4 components:

#### Component 1:

PLWH currently in the RWPA care system (Maintain)

#### Component 2:

PLWH Newly Diagnosed entering the care system

#### Component 3:

PLWH Out of Care / Lost to Care

#### Component 4:

**Unaware Population** 

## 24/25 Priority Setting Process - Norfolk TGA

## Resource Allocation Percentages by HRSA defined Service Category

Resource allocation percentages are developed and approved by the Planning Council based on the total grant award. The approved percentages are reported to the Recipient with the directive to apply service dollars in accordance with the approved resource allocations. The TGA's service priorities and allocations align with the updated National HIV/AIDS Strategy, the Integrated HIV Prevention and Care Plan and the TGA's Continuum of Care goal of viral suppression.

All funding decisions are data driven and include qualitative information on community needs with consideration of consumer input. The Planning Council weighs each data source based on relevance to determine and approve service category priorities. Unless service categories show a significant change in utilization, the Planning Council does not deviate greatly from the service categories allocation at the close of the previous grant year, this is to ensure that services are provided at consistent levels. With the data collected from needs assessments, community surveys, and current trends in service utilization, as well as the goals set by the

Planning Council to bring those out of care into care and those unaware of their status linked to care. The Planning Council was able to focus on the core services to include Medical Case Management, Mental Health Services, and Outpatient Ambulatory Health Services. Information on the number and demographics of PLWH, levels of unmet need, utilization, and expenditures from the previous three grant years, outcome measures of services categories and other available resources were presented to and considered by the Planning Council to increase access to care and services to reduce disparities.
